veterinary practice.**

 **September 2025 - May 2026**
 **Blended, Asynchronous**

This one-year certificate program introduces students to the veterinary industry and animal care practices needed for an entry-level position in the animal health field. Working with small animals, you will receive hands-on learning experience with useful principles and procedures of the veterinary industry.

Learning from Registered Veterinary Technologists instructors and veterinary professionals, students will gain skills in patient preparation, animal handling, and veterinary equipment and instrumentation knowledge.

For more information on the program,
contact your guidance counselor.
